

Lucas Anselmo Moraes Da Silva

Front-end Software Developer | lucasanselmodasilva02@gmail.com

Professional Profile

Junior front-end software developer specializing in JavaScript and TypeScript, with experience in frameworks such as React and Next.js. I excel in creating responsive and accessible web applications, integrating unit and integration tests to ensure high quality. Committed to open source principles, my contributions promote transparency and collaboration. I possess leadership and team coordination skills, always guided by best practices. I value accessibility and apply agile methodologies to optimize processes and deliver effective results. I continuously seek to improve my skills and take on new challenges.

Professional History

Tech Lead & Junior Analyst Programmer | Sofá na Caixa | January 2024 - Present

- I have significantly contributed to the development and visual enhancement of an e-commerce website. My responsibilities included structuring the site, creating pages and collections, and improving user experience. I actively worked on specializing and optimizing SEO, gaining essential skills to improve the site's ranking on search engines using appropriate tools.
- I was part of the team responsible for integrating the site with ERP tools, aiming to optimize the information exchange between the site and the ERP. This integration ensured efficient system updates with sales data and provided clarity for the production team.
- I was promoted to a leadership position in the development team, where I led the implementation of agile methodologies. I created the work ecosystem for agile methodologies, developing the Kanban board and defining Scrum process methodology. My responsibilities included organizing sprints and prioritizing tasks, ensuring efficient and collaborative project management.

Web Software Development Intern | Lepidus Tecnologia | August 2021 – August 2023

- I contributed to the development of "Periódicos em Nuvens," a comprehensive solution for techno-scientific journals that allows editors to focus on the editorial workflow and content of the journals. My role involved creating visual identities for portals and university journals in Brazil and Angola, utilizing open tools such as Open Journal System, Open Monograph System, and Open Preprint System.
- I led the renewal of the corporate website, focusing on the visual identity and technological update of the commercial site.
