Professional Profile

Tech Lead with solid experience in front-end software development, specialized in JavaScript and TypeScript, using frameworks such as React and Next.js. I have a track record of creating responsive and accessible web applications, integrating unit and integration tests to ensure high-quality final products. In addition to my technical skills, I lead and coordinate teams, applying agile methodologies to optimize processes and deliver effective results. Committed to open-source principles, I value transparency and collaboration, always seeking to improve my skills and tackle new challenges.

Professional Experience

Tech Lead | Sofá na Caixa & Eco Flame | January 2024 - Present

- Led the implementation of agile methodologies (Scrum and Kanban), responsible for organizing sprints, defining processes, and prioritizing tasks. Structured the work ecosystem to improve project management and promote efficient collaboration between teams.
- Developed and optimized e-commerce websites, including visual enhancements, page structuring, and improving user experience. Specialized in SEO, focusing on increasing visibility in search engines. Responsible for integrating ERP systems, such as Olist Tiny, ensuring efficient management of sales data.

Web Development Intern | Lepidus Tecnologia | August 2021 – August 2023

- Worked on the development of the "Periódicos em Nuvens" solution, a platform for techno-scientific journals that helps editors focus on the editorial workflow. Contributed to the creation of visual identities for university portals and journals in Brazil and Angola, using tools like Open Journal System, Open Monograph System, and Open Preprint System.
- Led the redesign of the corporate website, focusing on technological updates and the visual identity of the commercial site, ensuring a modern online presence aligned with market needs.

Academic Background

Bachelor's in Computer Science | IFSP, Salto Campus | 2020 - 2023

IT Technician | Etec Martinho Di Ciero | 2017 - 2019
